

Comcast (AT&T Broadband) As-Built Mapping Portland, Oregon

CableNet Designers Inc. is currently under contract to Comcast (AT&T Broadband), Northwest Division.

To upgrade the Oregon area CAD maps and HFC design files.

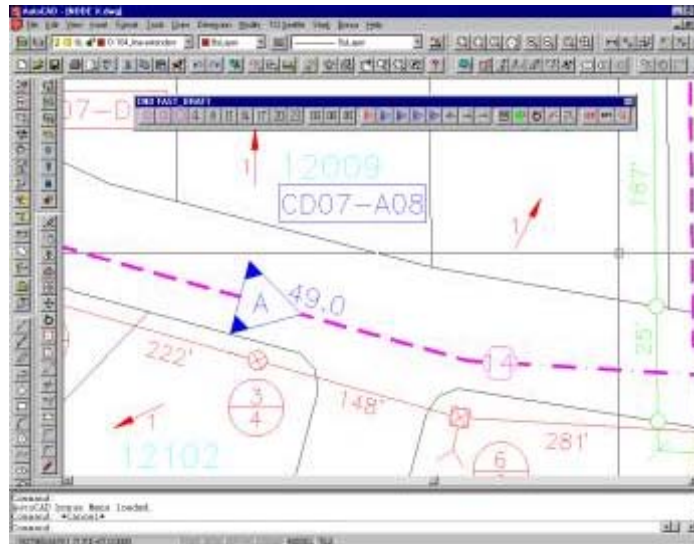

The objective of this project is to upgrade the

existing ACAD maps and Lode Data design files to accurately represent the information collected in the field while insuring a 750 MHz Telephony design.

As well as this project of more than 400 miles of as-built mapping and design upgrade, CableNet Designers Inc. has designed and mapped thousands of miles of plant for AT&T Broadband across the Nation.

Through proven operational procedures and rigorous quality control practices,

we are able to consistently deliver cost-effective network designs that exceed project specifications.

The scope of work on the project has

involved working in Lode Data™ and AutoCAD™ environments to deliver:

- Node area layout and planning.
- Fiber optics network integration.
- RF design with two-way capability.
- Telephony design.
- Strand mapping.
- Design drafting.
- Bill of Materials.
- Legacy data conversion.
